A Lesson Plan for Hard-Working School Teachers
House Democrats pass plan to skip \$632 million payment to teacher pension fund
Republicans offered hundreds of budget amendments, and all were rejected

BY THE MIDWESTERNER STAFF
MAY 9, 2024

An \$80.9 billion budget approved by Michigan House Democrats on Wednesday diverts \$632 million from the state's pension system for teachers to other priorities like electric vehicle chargers, drones and growing government jobs.

"House Democrats are grasping for any money they can find to pay for their massive budget," said Richland Township House Republican Leader Matt Hall. "They hiked the income tax and robbed Michiganders of the permanent relief they were promised. They're raiding the retirement funds of our hard-working school teachers.

BIBLICAL PRINCIPLES FOR POLITICAL ENGAGEMENT:

Christians must be grounded in what God's Word teaches. What does the Bible have to say about some morally weighty political topics, such as abortion, marriage, and poverty? Abortion and Marriage/Sexuality On both life and sexuality, the Bible is unequivocal— life begins at conception and abortion is murder (Ps. 139:13-16; Luke 1:39-45), and marriage is a lifelong covenant between a man and a woman (Gen. 2:24; Eph. 5:22-23). Scripture is also unambiguous regarding the moral status of homosexual conduct (Rom. 1:24-28; 1 Cor. 6:9-11). In terms of biblical clarity and priority, Christians have rightly recognized abortion and human sexuality as primary moral concerns. Public policy on these issues, if inconsistent with a biblical worldview, can have serious, even deadly, consequences. Defending the sanctity of life and God's intent for human sexuality can be a means of loving our neighbor.

Wayward Whitmer

"Abortion is safe and legal in Michigan — for now. As long as I'm in office, I will fight like hell to make sure it stays that way."

Dana Nessel trying to make oil and gas companies pay for causing climate change – absolutely ludicrous!!

“The fossil fuel industry was aware of the negative impacts of extraction and use of fossil fuels, but continued to knowingly engage in business practices and conduct that harmed the public’s health, safety, and welfare and the environment,” the Attorney General’s office wrote in its request for a special assistant attorney general, according to an [article](#) in The Detroit News.

What about the fact that mining for lithium and all the other critical minerals necessary to produce car batteries are much worse for the environment than using fossil fuels? A number of environmental and social impacts suggest that production of electric car batteries may result in worse outcomes for the country and the entire world.

This is just another hypocritical move by the Whitmer administration. Mining and its processing activities involve intense expenditures of energy and emit large amounts of greenhouse gases, according to the UN Environmental, which, ironically, is what the current U.S. government wants to reduce by eliminating fossil fuels in our country. Even worse, these activities abuse human rights of children by violating child labor laws and the rights of Indigenous people.

Visit Energy Citizens at energycitizens.org to find out what you can do to stand up for children’s rights and keep the American oil and natural gas industry strong.
